STRONGER. **TOGETHER.**

 **scafom-rux**

SCAFOM-RUX - COMPANY PROFILE

Scafom-rux is a manufacturer, distributor, and rental supplier of premium quality scaffolding, shoring and formwork solutions. With five strategically located production sites and a growing global presence in 20+ countries on 5 continents, Scafom-rux products are always close to you.

Founded in 1978 by Frans Brinkmann, the Scafom group has its roots and headquarters in the Netherlands. In 2005, the German scaffolding supplier Rux becomes part of the group, bringing with it another 50+ years of experience in the scaffolding industry. Our company name as it stands today is coined. Today, Scafom-rux is still a family-owned business and provides numerous professional scaffolding, shoring and formwork solutions for industries like construction, oil & gas, mining, shipbuilding, and more.

SCAFOM-RUX SUPPORTS YOU WITH RELIABILITY IN ALL MATTERS

Scafom-rux's services do not stop with the sale of a product. We also support you with advice based on over 50 years of experience in the business and rental solutions that increase your flexibility.

Excellent customer service, a strong global presence, professional trainings,

and technical support, Scafom-rux is a strong scaffolding partner for your construction, infrastructure, industry and shoring projects. Close communication with our customers and highest quality standards make Scafom-rux one of the world's leading manufacturers of premium scaffolding systems.

- Most complete product portfolio
- Innovative and inventive
- Long-standing experience
- Excellent customer service
- Highest quality scaffolding and shoring systems
- Maximum safety standards

FAMILY-OWNED BUSINESS AND A GLOBAL PLAYER

Scafom-rux products are based on decades of experience and an understanding of our customers challenges. Our globally operating group enables us to respond to customer needs in various industries all over the world.

Scafom-rux started off as a spindle manufacturer in the Netherlands. Since then, we have constantly adapted to the evolving challenges of the scaffolding industry. Today, our company is not only a distributor of scaffolding and shoring solutions, but also a globally recognized manufacturer and service provider.

Our more than 1000 colleagues worldwide ensure that you can always rely on the high quality and safety standards of our scaffolding and shoring systems. To make your work as easy and safe as possible, we ensure that our products meet the highest technical standards and have this certified by numerous independent institutes worldwide.

SCAFOM-RUX GLOBAL

With our offices, yards, and production sites all over the world, Scafom-rux has an excellent network to support customers worldwide.

At the end of the day, whether a product was made in China, Romania, Poland or Belgium is of no real significance to the user. The precondition, however, is that the quality is in focus. Scafom-rux runs five strategically located production sites. This way we can ensure high production standards and provide you with easy and fast access to our products.

FAMILY OWNED BUSINESS

1000+ EMPLOYEES AROUND THE WORLD

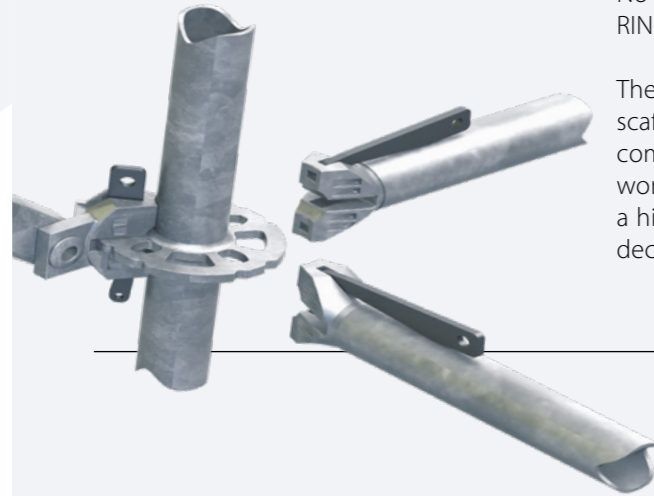

OPERATIONS IN 20+ COUNTRIES ON 5 CONTINENTS

85K+ TONS SCAFFOLD RENTAL MATERIAL

MODULAR SCAFFOLD RINGSCAFF UNBEATABLY VERSATILE

No matter what project is on your agenda, Scafom-rux modular scaffold RINGSCAFF provides you with the necessary flexibility.

The RINGSCAFF connector makes the assembly and dismantling of your scaffold particularly fast and easy. The system only consists of a few basic components that are easy to store. Certified by recognised authorities worldwide such as DIBT, AFNOR, AENOR, LNEC, RISE and more, RINGSCAFF is a high-quality modular scaffolding system that allows you to work safely for decades with hardly any maintenance costs.

COMPATIBILITY IN 07 DIMENSION CONSTRUCTION SCAFFOLD FRAMESCAFF

The FRAMESCAFF construction scaffold has a standard width of 73 cm and bay lengths in 07 dimensions. This makes it compatible with generally accepted market standards.

Thanks to its approvals by renowned German building authority DIBt, you can either use FRAMESCAFF components in combination with other 07 scaffolding systems or as an independent scaffolding system. The geometry of the FRAMESCAFF scaffold makes it self-aligning once it is levelled with the ground. This makes it especially easy to assemble within only a few steps.

MODULAR MEETS SHORING MODULAR SCAFFOLD DURALOK

DURALOK is a modular scaffolding and shoring system that stands out for its stability, safety and durability.

DURALOK is the optimum solution for both small- and short-term projects as well as long-term deployments in large-scale heavy duty industrial contracts. DURALOK only requires short assembly and dismantling times thanks to the clever assembly method. Four components can be fixed with only one single action.

CONSTRUCTION SCAFFOLD SUPER METRIC, FAST AND EASY

The Scafom-rux SUPER scaffolding system is one of the most popular systems on the market. No other scaffolding can be assembled and disassembled as quickly and requires as few basic elements. The SUPER scaffolding system is available in widths of 0.65 meters and 1 meter and has a standard stroke height of 2 meters.

The practical gravity lock ensures a self-securing connection between the frames, guardrails or diagonals. The components can be easily mounted by just one person without them having to go back and forth all the time.

SHORING AND STRUCTURE SUPPORT SYSTEMS
TRIED, TESTED AND PROVEN

The construction of roads, viaducts, bridge columns, as well as suspended floors in car parks and apartment complexes, requires strong, reliable and stable shoring systems. Proven Scafom-rux products combine strength with efficiency and ease of use. The product range extends from the classic BM push-pull prop to the advanced Ring Power System (RPS 100).

Especially worth mentioning: our POLY system is based on more than 25 years of practical experience and unique in the construction sector.

SHORING PROPS

Props have been the core of our product range for many years. Meanwhile we offer a wide range for every purpose. The best part: We can easily customize them for your specific needs. Their long service life also makes the Scafom-rux telescopic and push-pull props a financially safe investment with the best price-performance ratio.

Our high-quality screw and strut props are a trusted choice for projects in different sectors of construction. The integrated hand and drop-out protection make them especially safe to use.

WEATHER + CONSTRUCTION SITE PROTECTION

With system-free roofs and enclosures, rain, dust, and noise don't stand a chance. Scafom-rux weather and construction site protection systems only require a few, easy-to-handle standard components that can be modified and adapted to the most various application requirements.

For example, our MULTI ROOF and SCAFFGUARD can be quickly assembled with RINGSKAFF material. This is how the most space-saving and sustainable use of our scaffolding products is made possible.

SYSTEM-INDEPENDENT ACCESSORIES

A meaningful selection of accessory parts turns a standard scaffolding into a bespoke solution for various application purposes. Whether your client is a painter, bricklayer or roofer: with the optimally customised accessory range offered, you will be able to provide exactly the scaffolding your clients needs.

Scafom-rux offers a wide range of system-free accessories such as

- Couplers
- Stairs and ladders
- Lattice girders
- Planks
- Transportation and logistics solutions
- ...and more

PARTNERS IN SCAFFOLDING STRONGER TOGETHER

As a family-owned company we experience one thing again and again: we are the strongest when we all pull together. And as in a family, cooperation will be successful if it is based on constant exchange with each other on equal terms. Only in this way can we develop an understanding of each other's needs and meet them together.

This is exactly how we define our relationship with you as our client. Because one thing is for sure: You need more than a good product to make your project work. It's also about close and honest communication with each other to really support you in the challenges of your everyday work.

STRONG COOPERATION WORLDWIDE

Whether our colleagues are on spot for you in Germany or in Latin America – only the mutual support within the Scafom-rux team enables us to find the best solution for you across countries.

Be it the cooperation of our local engineering teams, the constant exchange of our expertise in a wide range of industries or the quick sourcing of special parts: Our understanding of acting as a global team allows us to offer you one of the most comprehensive product portfolios on the market and an outstanding customer service.

SCAFFOLDING SOLUTIONS THAT ALWAYS FIT

An excellent scaffolding system has real added value for you when it adapts to the various requirements of your work. That is why we attach great importance to well thought-out product design on the one hand and to the certified compatibility of our scaffolding systems with other leading systems on the other.

In addition, our product portfolio is structured in such a way that the individual components complement each other. The result is a strong product range with which you can sustainably maintain the value of your stock.

HIGH-QUALITY PRODUCTION

The running of our own production facilities gives Scafom-rux full control over the entire production process and quality assurance. Our five factories in total are located in China, Belgium, Poland and Romania and guarantee our customers easy and fast access to our products and the highest quality and safety standards.

A skilled and certified workforce and modern equipment ensures that customers can always rely on the high quality of Scafom-rux products. Our own quality assurance process starts with the selection of the suppliers of raw materials and continues throughout the entire production chain until the goods are safely loaded for shipping and transportation.

MAXIMUM SAFETY, INTERNATIONALLY APPROVED

Scafom-rux products are popular around the world for good reason. All Scafom-rux scaffolding systems are tested, certified, and regularly audited for their quality, durability, and adherence to industry wide standards. The high quality and safety of all our products is certified by several independent standards authorities worldwide such as the German Institute for Building Technology (DIBt), the French AFNOR, the English NASC, the Swedish RISE and the Spanish AENOR institute.

MIXING APPROVED!

CERTIFIED COMPABILITY

Mixing approvals help to make a scaffolding system cost-efficient and particularly versatile. When using a mixing-approved scaffolding system, you remain flexible while retaining the value of your current stock.

Scafom-rux modular scaffolding system RINGSCAFF is officially certified by the German Institute for Structural Engineering (DIBt) to be mixed with other leading scaffolding systems.

This way you can increase your planning flexibility, make the most of your stock and be free to always choose the best product with the best possible service. In addition, RINGSCAFF's mixing approvals replace elaborate static calculations.

RENTAL SOLUTIONS FOR EVERY PROJECT

Scafom-rux supports you with flexible rental solutions tailored to your individual needs: Your project has no defined duration? Thanks to its fully equipped rental facilities all over the world, Scafom-rux can offer you attractive conditions, helping you to activate the assets you already have.

Renting scaffolds reduces costs by eliminating the need for storage, maintenance and repair of parts, a service area, and maintenance staff. Scaffold rental equipment comes from Scafom-rux rental yards with a worry-free guarantee. We guarantee that our equipment has been serviced and properly maintained. Our team will be happy to inform you about our rental solutions.

SERVICES

> FLEXIBLE SOLUTIONS MADE FOR YOUR NEEDS

A successful project does not only demand careful planning but also some amount of flexibility. The project duration can be extended unplanned or a short-term need for a material supply can arise. In those cases, Scafom-rux supports you with a fast delivery of material or flexible rental or financial solutions.

Multiple deliveries well matched to the assembly speed of the scaffolders and delivery within one day are possible. Scafom-rux solutions do not stop with the smart design of a product. We also support you with advice based on over 50 years of experience in the business and solutions that go beyond the standard. Our team is dedicated to find the best solution for your project.

FLEXIBILITY

TRAININGS BY EXPERTS

The right planning, the correct handling, and the ability to know what to do in case of emergency, are equally important as high-quality scaffolding systems. That is why Scafom-rux offers regular trainings as well as special trainings for scaffolders, engineers or your external partners.

- **Trainings for scaffolders:**
Learn how to assemble and dismantle our scaffolding systems.
- **Trainings for engineers:**
Our engineers teach you the planning and configuration of our products.
- **Rescue trainings:**
Our trained staff prepares you for what to do in case of emergency and teaches you in what to do to prevent accidents.
- **Trainings for scaffolding calculation and technical design:**
Our experts support you with the implementation of your project as well as with the assembly and usage of each of our systems.

TECHNICAL SUPPORT

TECHNICAL SUPPORT FROM ENGINEERING EXPERTS

For the most efficient planning of your project, sometimes a little help is needed. The Engineering Team at Scafom-rux is happy to support you with several scaffolding and technical services to make your project a successful.

Our Technical Department can provide you with designs, drawings and static calculations before and during your project including visits to the project site if needed. Complete planning of your scaffolding project from start to end is also possible.

SCAFOM-RUX, YOUR GLOBAL NETWORK FOR SCAFFOLDING & SHORING

Scafom-rux's global network includes offices, yards and production facilities in Europe, North and South America, and Asia. This allows us to keep our delivery routes as short as possible and to always give you easy and quick access to our scaffolding products.

With a wide product range, an inventive spirit, and long-standing experience, Scafom-rux offers highest quality scaffolding, shoring and framework systems with maximum safety standards. Thanks to our global network, Scafom-rux is always close to you, guaranteeing you fast deliveries, easy access to our products and excellent quality.

Castle Neuschwanstein in Germany. *Narrow access roads, impassable terrain and crowds of visitors notwithstanding, Scafom-rux SUPER 65 scaffolding system in combination with a modular scaffolding system was erected to renovate the exterior façade of the globally known historic building.*

Europoort Power Plant in the Netherlands. *The multidirectional RINGSKAFF system was ideal for the work on the power plant in Rotterdam. Thanks to its flexibility, the scaffolding could be adapted to the challenging shape of the object.*

PROJECTS

COMPANY OVERVIEW

Repsol Refinery in Spain. *The assembly of the 90 metres high RINGSCAFF scaffold for sandblasting work at the refinery in Tarragona was a real statical challenge. The difficulties posed by the temperature fluctuations of the refinery, the increased wind load added by the protective tarpaulins, and the accumulating blasting material were solved with careful planning of the anchoring, a special configuration and perforated steel planks.*

PROJECTS

Guilong Highway in China. *One million cubic metres of SPS, Duralok and SBS 135 material were used for the construction of the 12 km long Highway in the Guizhou Province. Special designs of shoring had to be done for the project.*
